

About the Workshop

The new challenges of maintaining balance between development and environment have lead to the demand for effective knowledge base about Biodiversity and Ecological harmony. The workshop has been designed after much request from our corporate clientele who are eager to develop a constructive base which will help them to positively cater to the needs of their corporate responsibilities towards biodiversity and environment.

Expected outcomes of this workshop:

- Offers basic insight to techniques used for biodiversity assessment
- Debate and discussions for challenge areas for biodiversity in corporate sector
- Opportunity to discuss various perspectives under one roof

Who can attend and benefit:

- ESG heads and professionals
- Environment heads from industries and professionals
- Current & Aspiring environment professionals

**Last date for Registration -
30th November, 2023**
